A VILLAGE GARDEN

Warrensburg, Illinois

TO OUR CUSTOMERS

Address all orders to A VILLAGE GARDEN, Warrensburg, Illinois.

On all orders, amounting to less than \$3.00, add 35c to cover cost of packing and shipping.

Unless otherwise specified we will begin filling orders for iris about August 1st. We believe that iris shipped after this date will give nearer to typical bloom the first year. In the far south we would suggest planting as late as September or October.

We recommend early fall planting for daylilies. A few can be furnished for spring planting if so desired.

Peonies will be sent as soon after September 1st as possible.

Narcissus should be ordered prior to July 1st.

On all orders amounting to not less than \$20.00 either a 10% discount will be allowed or extra plants not to exceed 10% of the total value will be sent at your option. Send a list of varieties from which you would like us to choose extras if plants are available. Collections and prices marked "NET" not subject to further discount.

On all orders exceeding \$25.00, a permanently bound copy of the new book—"THE IRIS, An Ideal Hardy Perennial," may be had in lieu of other discounts.

GUARANTEE

All plants guaranteed to be true to name and to be in good condition at time of receipt. If plants are not in good condition on arrival return immediately for replacement or refund. No Guarantee, real or implied, is given that plants will not die to reasons beyond our control.

A FEW IMPORTANT TOPICS IN IRIS CULTURE

BORER:—Iris borers can be controlled by the use of the several D. D. T. sprays recommended for garden use. These sprays, mixed according to the manufacturers directions, should be applied at least three times during the season. The first application should be made soon after the new growth appears above the ground. The second application should be made as the buds appear above the foliage. A third application should be made at the end of the blooming season. Due to weather conditions it may be desirable to make additional applications between the first and second recommended. At all applications spray the grass at the edges of the beds. Control of this pest helps greatly in the prevention of

BACTERIAL ROOT ROT. I have found that further control of root rot may be effected by the application of a solution of Pottasium Permanganate. I have given the ground at the base of the plants a thorough soaking with 1:4000 solution applied toward the end of the blooming season seems to be helpful. In dry years this solution may be too strong. For other information on iris and their culture consult

THE IRIS, An Ideal Hardy Perennial. This new book, published by The American Iris Society contains 224 pages dealing with 23 important phases of iris culture. This book may be purchased with a heavy paper binding for \$1.50 or in a permanent binding for \$2.50. Send checks to either A VILLAGE GARDEN or to The American Iris Society, 444 Chestnut St., Nashville 10, Tenn.

GREETINGS

Again we are pleased to greet you and make you welcome in A VILLAGE GARDEN.

In 1948, with almost ideal weather conditions, many visitors were in the garden during the daffodil, iris and peony seasons. Extremely rainy weather in July affected the number who came to see the hemerocallis. Nevertheless few days passed without visitors from some distance. A severe spring freeze destroyed many of the chrysanthemums so that the fall bloom was rather scattered. We hope that 1949 will bring an almost continuous parade of flowers from early April until late October. Don't stay away.

We will have many of the newer daffodils in bloom throughout April and early May. A number of new 'pink cups' have been received from Australia. These will probably not be at their best for another year but they should prove interesting. From Europe we have received such fine things as Broughshane, Golden Torch, Hunter's Moon, Krakatoa and others. There are also several seedlings from American growers.

During the iris season many newer varieties, as well as a number of guest seedlings being grown on trial, will be seen. Among the seedlings will be varieties from the gardens of Eva Faught, Karl Bauman, Clifford Benson, Hod Hodson, Harold Knowlton, Greig Lapham and others. Besides this year's introductions there are several which promise to be of special interest. Mrs. John Moore of Benton, Ill., has sent a plant of her seedling 48-11. This is a very dark, ruffled flower from a cross of Sable x Narain. THE THEIF from the garden of Karl Baumann is much deeper in color than OLA KALA and promises to be one of the most outstanding Yellows. BLIZZARD from Harold Knowlton and STARSHINE from Jesse Wills are scheduled for 1949 introduction by other dealers.

Many visitors who have not become acquainted with the newer peonies become very enthusiastic over our planting. Besides some of the new hybrids our plant of MIKADO, in the home garden, which consistently bears over 120 blooms comes in for its share of comments.

Our Hemerocallis planting is one that will show the rapid strides which are being made in the development of this flower. Here it will be possible to compare HESPERUS, rated No. 1 in a poll of the members of the Hemerocallis Society, with such new yellows as REVOLUTE, GOLDEN GIRL and ANITRA. Among the newer orange flowered varieties are MEADOW GOLD, NARANJA, ORANGE BEAUTY and VALIANT. We believe that our own KNIGHTHOOD is tops among the dark reds while FOUR WINDS and SCARLET SUNSET are very fine among the newer lighter reds. Others deserving special mention are AMHERST, EASTER MORN, FLUFFY RUFFLES and PAINTED LADY. A visit to our garden in July will prove the possibilities of this flower, just coming into popularity.

Remember there are no gates at A VILLAGE GARDEN.

RALPH M. SCHROEDER.

NEW INTRODUCTIONS

The eight new iris being introduced this year have been thoroughly tested. We believe that they will prove worth while in any garden. Some of the originators are known to you. Others may not be.

Clifford Benson of St. Louis, Mo., has appeared on the scene for the first time. His four originations bloomed for the first time while he was in Europe with the army during the recent imbroglio. He has resumed his work with iris and we may expect more from him in the future. He is employed at Lambert Field airport.

Miss Eva Faught, who has given us CAHOKIA, ILLINOIS SUNSHINE and PIERRE MENARD, now gives us MORNING and SUNRISE SHADOWS. Bulletin 110 of the American Iris Society tells more about Miss Faught. MORNING is the variety mentioned as ODDITY in that article.

E. G. (Greig) Lapham is better known to some folks as a raiser of bantam chickens. One of these, Frances, rules the "roost" at 1103 Strong Ave. We have no information that she is in any way responsible for the many good reds and pinks that have come from his iris garden. He does have valuable help in Charley Wise at Wakarusa. I think we will hear more about Charley at a later date.

The originator of BRIGHT SONG is only the VILLAGE GARDENER.

BRIGHT SONG (Schroeder). Large ruffled flowers of rose pink with a tangerine beard. The eight flowers with arching standards and falls are carried on excellently branched stalks. While the buds of this variety are not pink its garden effect is more pink than the new warm pinks. The blooms which last for 4 days hold their color well. Should prove valuable as a breeder (Far West x Midwest Gem) x Morocco Rose) x (Golden Eagle x China Maid). Early, 39" ----- \$15.00

ESTATE (Benson). An exquisite medium sized chaste white self with excellent substance. The hafts are wide without markings and the falls are semi-flaring. A perfect iris for the front of the border. A sister seedling to White Sentry. 28" ----- 10.00

MORNING (Faught). This iris was seen in our garden in 1948 under the name of ODDITY. The tall well branched stalks bear many medium sized flowers of an unusual and pleasing combination of colors. The domed standards are white are edged with a wide band of cream at their base. The flaring falls are pale blue. One of the finest in pastel coloring. Has the good plant habits of its parent Spun Gold. Late midseason. 38" ----- 10.00

RED WAVES (Lapham). The reddest iris to date. The arching standards and flaring falls are of the same shade of brilliant Indian Lake. There is a minimum of haft markings. Substance and ability to hold its color is excellent. Branching ample. Has already proved its worth as a parent, I believe that this variety will be a pleasure both as a breeder and a garden variety. Midseason. 28" ----- \$10.00

SUNRISE SHADOWS (Faught). The name was arrived at from the rose lights on the clouds from the rising sun. It is one of the most brilliant iris in the garden. Its deep rose tones are similar to those of INSPIRATION but unlike others of that coloring it does NOT fade. The rounded form and excellent branching and substance make it an ideal garden variety. Midseason. 36" ----- \$15.00

SWAN LAKE (Benson). A fine medium sized, crisp, light blue self with exceptionally fine form and substance. The standards are domed and the falls semi-flaring. Flowers are nicely spaced on a well branched stalk. Most outstanding seedling at Missouri Horticulture Society show 1947. A. I. S. Certificate of Commendation 1948. BIRCHBARK x GREAT LAKES. Midseason. 36" ----- \$12.50

TOSCA (Benson). A delightful ruffled medium lavender blue self. Standards are domed and the semi-flaring falls are wide at the haft. Possessing excellent substance, it stands up perfectly in wind and rain. A. I. S. Certificate of Commendation 1948. Brunhilde x Gloriele. Midseason. 36" -- \$15.00

WHITE SENTRY (Benson). A white iris with no other color to mar its chaste appearance. The medium sized, ruffled flowers with wide hafts and a glistening sheen are of exceptionally heavy texture and withstand wind and rain with ease. Without doubt the most outstanding flower at the St. Louis show in 1948. A. I. S. Certificate of Commendation 1948. Only large stock makes introduction possible at the price. BIRCHBARK x BRUNO. Midseason. 36" ----- \$10.00

G-10 (Lapham). Flamingo pink of excellent form, substance and branching. It is the latest as well as one of the tallest of this coloring. It has been deemed not advisable to name it. As its value as a parent has been proved it is made available to those interested. L. M. 36" -----\$5.00

BRIGHT SONG, MORNING, RED WAVES and SUNRISE SHADOWS ---\$45.00

ESTATE, SWAN LAKE, TOSCA and WHITE SENTRY -----\$42.50

1948 INTRODUCTIONS

CAHOKIA (Faught). Large exquisitely formed flowers of light butterfly blue delicately veined deeper. There is no hint of lavender in the color. The standards and falls are arching. The beard is golden yellow and all haft marks are hidden by the extreme fullness of the flower. The stem is strong with 3 wide well balanced branches carrying from 5 to 6 flowers. The substance is excellent. L. M. 42". H. C. A. I. S. 1947 -----Net \$20.00

ORIENTAL BAZAAR (Buneaux). One of the most colorful iris. The domed standards are amber with the upper half flushed red. The falls are lilac rose edged with a band of amber 3/16" in width. The hafts are reddish amber and the amber styles seem to envelop the yellow orange beard. Late, 36". H. M. A. I. S. 1948 ----- \$12.50

PIERRE MENARD (Faught). Very fine medium blue self. The slightly open standards are hyacinth blue. The flaring falls are campanula violet veined hyacinth blue. The canary yellow beard is surrounded by a patch of light hyacinth blue. The stem is strong with close but well spaced branches. Mid-season. 36". H. C. A. I. S. 1946, H. M. A. I. S. 1948 ----- Net \$20.00

THE PENGUIN (Goodman). A very unusual and colorful plicata. The ground color is white. The broad arching standards are heavily dotted cinnamon brown. The broad falls have a white center surrounded by a 3/8" margin of cinnamon brown. The colors of this plicata carry very well. Branching good. Substance excellent ----- \$12.50

OUR FAVORITES OF THE IRIS GARDEN

THE AMERICAN PEONY SOCIETY

For those who enjoy peonies, a membership in the AMERICAN PEONY SOCIETY will double that enjoyment. The four bulletins issued each year enable you to "have" peonies the year round. Send your check for \$3.00 to Mr. W. F. Christman, Sec'y, Northbrook, Ill., for a year's membership.

If applications for membership are sent through A VILLAGE GARDEN, one of the following varieties will be sent without charge:

A. B. Franklin, Amo No Sode, Ella Christiansen, Elsa Sass, Isani Gidui, Kelway's Glorious, Mme. Emile Debatene, Myrtle Gentry, Phillipe Rivoire, Therese.

Please select 3 of these varieties to choose from. Lack of large stocks makes it imperative that we be allowed to make further substitution where necessary so please indicate any varieties which you might have.

HEMEROCALLIS

NEW INTRODUCTIONS

COPPER COIN (Schroeder). Large open flowers of yellow flushed coppery red giving much the color effect of a new one cent piece. Often gives second bloom in the fall. Scapes well branched and produces bloom over a long season. 46" July-Aug. -----\$7.50

RASCAL (Schroeder). Medium sized flowers of cherry red slightly deeper at the eyezone. Floriferous. This has proved to be one of my best parents. 36". June-July -----\$5.00

1948 INTRODUCTION

KNIGHTHOOD (Schroeder 1948). 4¼ ft. This large velvety maroon flower is one of the best dark varieties I have seen. Every one who has seen it in my garden have admired it and the reports from gardens where it has been tested are enthusiastic. It holds its form and color under the most adverse weather conditions. The wide petalled flowers are over 6 inches across. The color is deep Chrysanthemum Crimson with an orange throat and with narrow orange midribs on the petals. The edges of the petals turn up slightly giving a ruffled appearance. We have had as many as 52 blooms on the well branched scapes. The demand and short stock keeps the price up. ----- Net \$15.00

DAFFODILS

From early April until the middle of May these glorious flowers, combining the many shades of yellow and white with pink, red and orange, illuminate the garden. A visit at that time will show why this flower has increased so rapidly in popularity in the last few years.

Before each variety is the index number according to the following classification chart.

1. Trumpet Daffodils. Trumpet as long or longer than the perianth segments.
 - a All parts of the flower some shade of yellow.
 - b Trumpet and perianth white.
 - c Perianth white, trumpet in shades of yellow.
2. Incomparabilis. Crown more than one-third but no as long as the perianth segments.
 - a Shades of yellow with or without red coloring on the cup.
 - b White perianth. Cup as above.
3. Barri. Cup less than one-third the length of the perianth segments.
 - a Shades of yellow with or without red on cup.
 - b White perianth. Cup as above.

4. Leedsii White perianth. Crown white or cream or tinged pink.
 - a Cup as for incomparabilis.
 - b Cup as for barri.
5. Triandrus Hybrids.
6. Cyclamineus Hybrids.
7. Jonquilla Hybrids.
8. Tazette Hybrids.
9. Poeticus.
10. Double.
